

# QUIKCLEAN

QuikClean is a powerful, environmentally friendly degreaser that quickly cleans even the most severe hydrocarbon build-ups.

- Safe
- Powerful
- Fast-acting
- Non-toxic
- Non-corrosive
- Biodegradable

## What is it?

QuikClean is a non-toxic, non-flammable, powerful bio-solvent/surfactant. It is a synthesized, non-microbial enzyme that has been engineered to enter the porous matrix of a metal and completely remove all traces of hydrocarbons.

## How it works

The powerful enzymatic action of QuikClean quickly penetrates through the hydrocarbon layers that adhere to metal surfaces. QuikClean easily removes oils and greases commonly found in the industry, such as dirt, grime, solids and other contaminants.

## Applications

QuikClean is powerfully effective at cleaning all metal surfaces. In a 500 hour salt water blast test, QuikClean consistently out performs every other pretreatment as the strongest and most thorough preparation for:

- Painting
- Powder coating
- Epoxy plating
- Welding
- Bonding

QuikClean is so effective that its applications include metal cleaning measured by porous matrix strip testing, bonding and adhesion and other regulated standards testing.

QuikClean sets the standard in industrial cleaning solutions.

## Industry solutions

QuikClean offers the most complete solution for metal washing and cleaning in the following industries:

- Corrosion Control
- Parts Manufacturing
- Paint
- Printing
- Autobody
- Machine Shops
- Aerospace Metal Fabrication
- Sheet Metal Fab
- Foundry Products
- Industrial Inspections
- ISO Support
- Machine Tools Manufacturing
- Automotive Machining and Detailing
- All other industries in which metal surfaces must be cleaned thoroughly and made free from oil residues

## Materials

Materials that will benefit from a QuikClean washing include: carbon steel, iron, stainless, brass, copper, bronze, aluminum, cast metals, and more. Because of its unique properties QuikClean has also been found effective in cleaning hydrocarbons from plastics and composite materials.

## Safety

A cleaning protocol using QuikClean eliminates the need for special handling equipment and hazardous waste disposal, thereby increasing worker and workplace safety. QuikClean removes the need for chlorinated solvents such as xylene, MEK, and acetone. QuikClean is safe for workers and the environment. It is 100% biodegradable, phosphorus and boron free, and helps you comply with new environmental standards.
